

Based on my most prominent traits I can tell you that my intelligence, adaptability, and positive attitude will be a great asset to your company. Obviously, anyone can be intelligent, but you cannot do much with it if you are not adaptable. Since this would be a new job it would take a month or two for someone to get adjusted to the work but for me, it will take One to Two weeks to become accustomed to the job. If I am comfortable with everything in this short amount of time, there will barely be any mistakes in my workload. I also mentioned the fact that I have a positive attitude and that is something that is especially important to the workplace. Having a positive attitude gives people the power to get things done. Having a positive attitude can encourage others to go beyond with their own work. All I can say is that these traits have major values that the workplace needs and I possess those traits and I know I can make this place even better.
